Summary

Senior Software Engineer with 10+ years building scalable, production-grade web applications across fintech, e-commerce, and media. Specialises in TypeScript, React, Next.js, and serverless AWS architectures, with a track record of leading greenfield initiatives, design systems, and legacy-to-headless migrations. Combines hands-on full-stack delivery with technical leadership — mentoring engineers, setting standards, and driving cross-functional alignment.

Skills

Frontend: TypeScript, JavaScript, React, Next.js, Redux, React Query, HTML5, CSS3, CSS-in-JS, Tailwind, Webpack, Storybook

Backend: Node.js, GraphQL, Express, Serverless, REST API design

Cloud & Infra: AWS (Lambda, API Gateway, SQS, DynamoDB, MSK/Kafka), Docker, Turborepo, Monorepos

Data: PostgreSQL, SQL, Prisma, MongoDB

Testing: Jest, Vitest, React Testing Library, Cypress (TDD/BDD)

Tooling & Other: Git, CI/CD, Sanity CMS, Shopify, Observability (Datadog), GenAI / Claude Code

Experience

Senior Software Engineer, Travelex

Aug 2024 – present

- *Stack:* TypeScript, Next.js, React, Turborepo, AWS, Serverless, Node.js, Sanity CMS, Vitest
- Founding engineer on a greenfield legacy-migration initiative, shaping the architecture and delivery approach adopted across the programme.
- Led strategy and implementation of a company-wide multi-brand design system powered by design tokens.
- Directed the enterprise migration from legacy platforms to a headless Sanity CMS, reducing content maintenance overhead and streamlining publishing workflows.
- Established repository governance, coding standards, and best practices across the company monorepo.
- Drove organisation-wide AI adoption, defining and rolling out Claude Code best practices across engineering teams.
- Contributed architecture and delivery to the in-store media display migration.
- Mentored engineers and onboarded new hires, raising team capability and engineering standards.
- Partnered with product, design, and marketing leadership to deliver scalable CMS workflows and cross-team alignment.

Senior Software Engineer, Togather

May 2023 – June 2024

- *Stack:* TypeScript, Next.js, React, Node.js, GraphQL, Prisma, PostgreSQL, AWS, Serverless, Express
- Core contributor rebuilding the internal React design system using atomic design principles.
- Built a Node.js quote-recommendation filter using AWS Lambda and MSK/Kafka message brokers.
- Delivered a serverless Salesforce integration via AWS API Gateway and Lambda using a CRUD approach.
- Drove adoption of TypeScript and best-in-class automated testing across the platform.
- Introduced a technical design-documentation process that was adopted as standard across all projects.
- Core contributor to the public Node.js GraphQL API and PostgreSQL database.
- Mentored junior engineers, focusing on functional programming and SOLID principles.

Senior Software Engineer, Lick

May 2021 – May 2023

- *Stack*: TypeScript, Next.js, React, Node.js, GraphQL, AWS, Serverless, Shopify, PostgreSQL, DynamoDB
- Core contributor to a TypeScript monorepo spanning Next.js apps, an Express API layer, Hygraph headless CMS, and a Cypress E2E suite.
- Designed and built a serverless, event-driven microservice architecture for a Screwfix integration using AWS Lambda, API Gateway, SQS, and DynamoDB.
- Led a Node.js project aggregating all product data into a CRM product-data feed.
- Built and contributed to the backend data-aggregation layer and CMS data modelling/integrations.
- Implemented Datadog observability (monitors, heatmaps, error tracking) to ensure microservice uptime.
- Worked across the full product development lifecycle in a fast-paced early-stage startup.

Senior Software Engineer, News UK (The Times)

Dec 2020 – May 2021

- *Stack*: TypeScript, Next.js, React, React Native, Node.js, GraphQL
- Core engineer building and releasing a new TypeScript React Native puzzles app for iOS and Android.
- Scoped and delivered a major feature for The Times' core Node.js Apollo Server within a microservice architecture.
- Built AWS Lambda functions (Serverless Framework) to streamline integration with legacy systems.
- Mentored engineers through 1:1 supervision.

Software Engineer, News UK (The Times)

Nov 2019 – Dec 2020

- *Stack*: React, TypeScript, Node.js, Apollo, GraphQL, CSS-in-JS
- Maintained and developed The Times' core Node.js monorepo with a strong functional-programming focus.
- Built a new subscription-cancellation application using Apollo, GraphQL, TypeScript, and React.
- Co-architected a new help application using React, TypeScript, CSS-in-JS, and Algolia.
- Improved the core CircleCI pipeline and maintained unit (RTL) and E2E (Cypress) suites with a TDD/BDD focus.

Software Engineer, Arcadia Group Ltd

Jan 2018 – Nov 2019

- *Stack*: React, Redux, Node.js, Hapi.js, Jest, Enzyme, Cypress
- Scoped and developed complex projects for Arcadia's legacy platform and new e-commerce re-platform.
- Built microservice-supporting applications with React/Redux.
- Implemented real-time business-metric tracking via Google Tag Manager/Analytics.
- Managed weekly code releases and handled deployments with Jenkins.
- Wrote unit (Jest/Enzyme) and functional (Cypress) tests.

Front End Developer (Mid → Junior), KHWS

Feb 2016 – Dec 2017

- *Stack*: JavaScript, jQuery, Angular, SCSS (BEM), AEM, Grunt, Gulp
- Delivered large-scale client campaigns from initiation to launch.
- Built features for global-client websites and apps with a focus on DRY principles and responsive, cross-browser development.
- Applied OO/functional patterns and Git-flow version control.
- Began at KHWS as Digital Client Account Executive (Dec 2014 – Feb 2016) before transitioning into development.

Education

London Metropolitan University, BA in Criminology and Media Studies

2010 – 2013

- Upper Second-Class Honours (2:1)
